DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Tanaka et al. (US/4,058,100).
3. Tanaka et al. shows an auxiliary valve (6) positioned in an intake passageway of a four-cycle internal combustion engine for controlling the flow of air/fuel mixture into a combustion chamber, comprising: a through passage (2), said through passage defined by a top wall, a bottom wall, and opposing side walls, a swingable door (6) openable and closable in relation to said through passage; and a spring loaded assembly (10,11) biasing said swingable door closed. An auxiliary valve further comprising an attachment bracket (5) secured to said top wall (1), said bracket (5) serving to secure the auxiliary valve inside the intake passageway.

Allowable Subject Matter

4. Claims 3-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The art cited (US/4,320,725), (US/3,972,314) (US/4,858,567) and (US/6,332,442) all disclose an auxiliary valve positioned in an intake passageway of a four-cycle internal combustion comprising: a through passage with a swingable door openable and closable in relation to said through passage.
